RESEARCH INTERESTS

My research focuses on various aspects of system security, such as vulnerability detection, mobile security, trusted execution environments, static and dynamic analysis of source code, and binaries. I am also interested in developing novel static/dynamic program analysis techniques for system security problems. My research resulted in various Open-source security tools and several Common Vulnerability Exposures (CVEs) in critical system software such as kernel drivers and bootloaders.

Positions & **EDUCATION**

Assistant Professor (PurS3 Lab)

Department of Electrical and Computer Engineering

Purdue University, West Lafayette, USA

Postdoctoral Researcher Aug 2020-Dec 2020

University of Pennsylvania, Philadelphia, PA, USA

Advisor: Mayur Naik

Ph.D in Computer Science

Sep 2014- Aug 2020

University of California, Santa Barbara, USA Advisors: Christopher Kruegel and Giovanni Vigna Thesis: Securing smart devices from the bottom-up

Supported by:

Symantec Research Labs Graduate Fellowship **UCSB Graduate Division Dissertation Fellowship**

Conference **Publications**
